

Six advantages of used software for your company!

1) Cost-effective

Software ReUse offers you proven software at prices that are up to 70% cheaper than the original prices:

- Microsoft Office 2019 Professional Plus
- Windows 10 Pro
- Windows Server, Exchange Server, Sharepoint Server 2019 Client Access Licenses (CALs)
- Microsoft Server licences (Windows Server, SharePoint, Exchange)

2) As good as new

Software doesn't wear off. There is no difference in use between new or used licences. You purchase the software with the same usage rights as the first licensee. We will be pleased to inform you about those rights when you purchase your licence.

3) Legally compliant licences from the EU and the EEA

The sale of used software was legitimised by the European Court of Justice on 3 September 2012 (Case C-128/11). We take into account all statutory regulations which are necessary according to the judgement (first licensee in the EU or the EEA, proof for the cancellation is required, manufacturer has to be adequately compensated). Thus, the legal compliance within your company is guaranteed 100%.

4) Audit reliability and disclosure

Audits are carried out regularly in your company and you are concerned regarding the application of used software? This concern is unfounded. Since 2011, we have transferred licences of renowned manufacturers (Microsoft, Adobe, Autodesk) for over 1,000 clients – without any objections being made.

Software ReUse supplies all documents necessary for the audit, which allows you to demonstrate the property rights on your licences to the manufacturer. This includes the first licensee's cancellation deed, contract data and all further required documents.

5) Easier to purchase than new licences

Purchasing licences at Software ReUse may be easier than buying new licences. Why? Because you don't have to conduct laborious negotiations on sometimes expensive long-term contracts, and even smaller quantities can be reordered in an uncomplicated way.

6) A good alternative to leasing models or a great supplement

Are you planning to switch to the Microsoft leasing model, but not quite ready yet? Here again, we can offer you used Microsoft perpetual licences as an interim solution.

We would be pleased to give you advice!

As you can see, there are many advantages of used software from which your company can benefit. Please contact us at: +43 1 9972787-10, or send an e-mail to lizenzieren@software-reuse.eu – we would be pleased to advise you on the potential of used software for your company.
